

BE OPEN TO SAFE STORAGE

PROTECTING YOUR SPACE AND YOUR PEOPLE

Cannabis products can *look* like regular snacks, drinks, or candy. It's easy for the wrong hands (or paws) to grab them by mistake. Kids, pets, and even curious guests can easily mistake edibles or infused drinks for a treat. That's why it's super important to store any form of cannabis safely and securely. A little caution goes a long way.

CANNABIS STORAGE 101

Keep it safe with these quick tips:

- **Use smell-proof, child-proof containers:** Not just for kids—dogs and roommates can get curious too.
- **Lock it up or stash it high:** A top shelf, lockbox, or coded safe = no accidental grabs.
- **Clean up immediately:** Put everything away right after use. No joints on the counter. No gummies on your desk.
- **Don't mix with regular food:** Never store cannabis next to snacks or drinks—keep it in its own zone.
- **Toss responsibly:** Mix old edibles with coffee grounds or kitty litter before putting it in the garbage.
- **Know the signs of a bad reaction:** If a kid or pet gets into it, call Poison Control or a vet ASAP.
