Shakopee Community Testing Demographics

These demographics and results are for testing completed July 24, 2020 at Canterbury Park in Shakopee.

The State of Minnesota, in partnership with the Scott County Public Health, offered COVID-19 testing at Canterbury Park in Shakopee.

- Testing was open to everyone. Residents of neighboring communities were eligible to be tested. People who lived further away were encouraged to find a local clinic before registering.
- People with and without symptoms were tested.
- Testing was free, no insurance needed.
- Pre-registration was encouraged and could be done online and by phone.
- Testing was administered by professional medical staff.

Positivity rate: 5.73%

- 768 people were tested.
- 44 people were confirmed positive (cases).

Symptoms

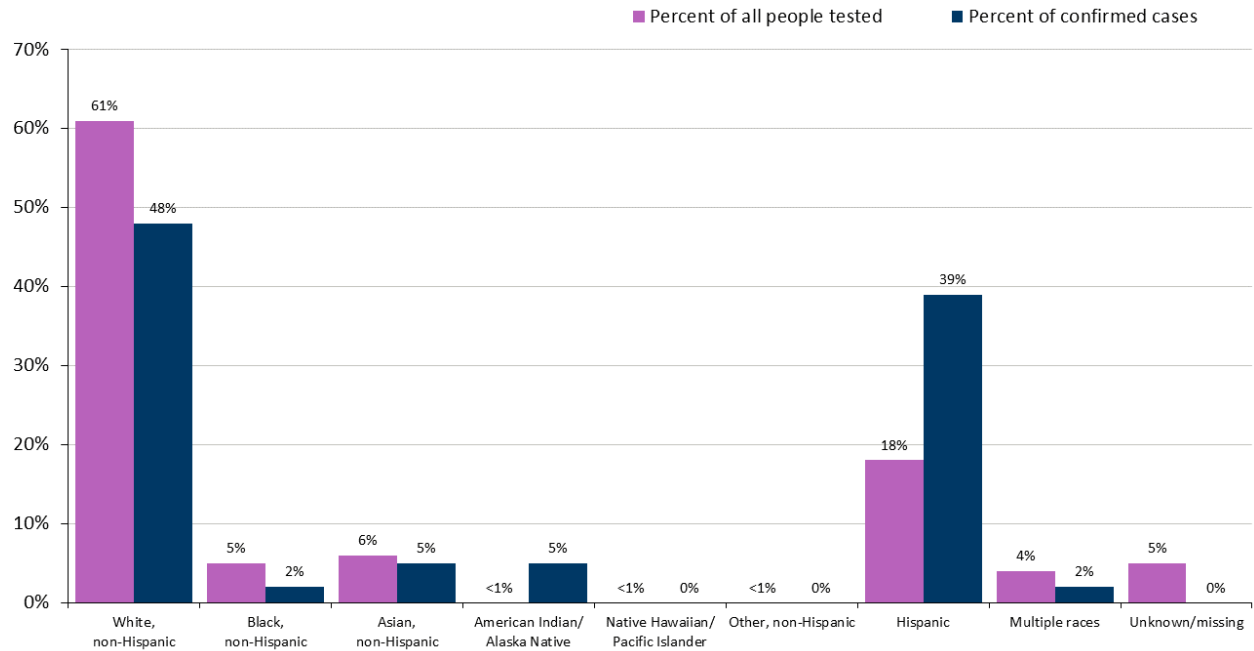

41% of those who tested positive did not have symptoms at the time of testing. This speaks to the importance of staying home and isolating if you believe you were exposed and wearing a mask and washing your hands to reduce potential spread.

Age

Age	Age of all people tested	Age of confirmed cases
Age range	1-87 years	1-68 years
Average age	38	33

Race/Ethnicity

People were able to select from all race/ethnicity categories that applied to them. Those listed within a race/ethnicity category only selected one race/ethnicity. If they selected more than one, they are listed under multiple races.

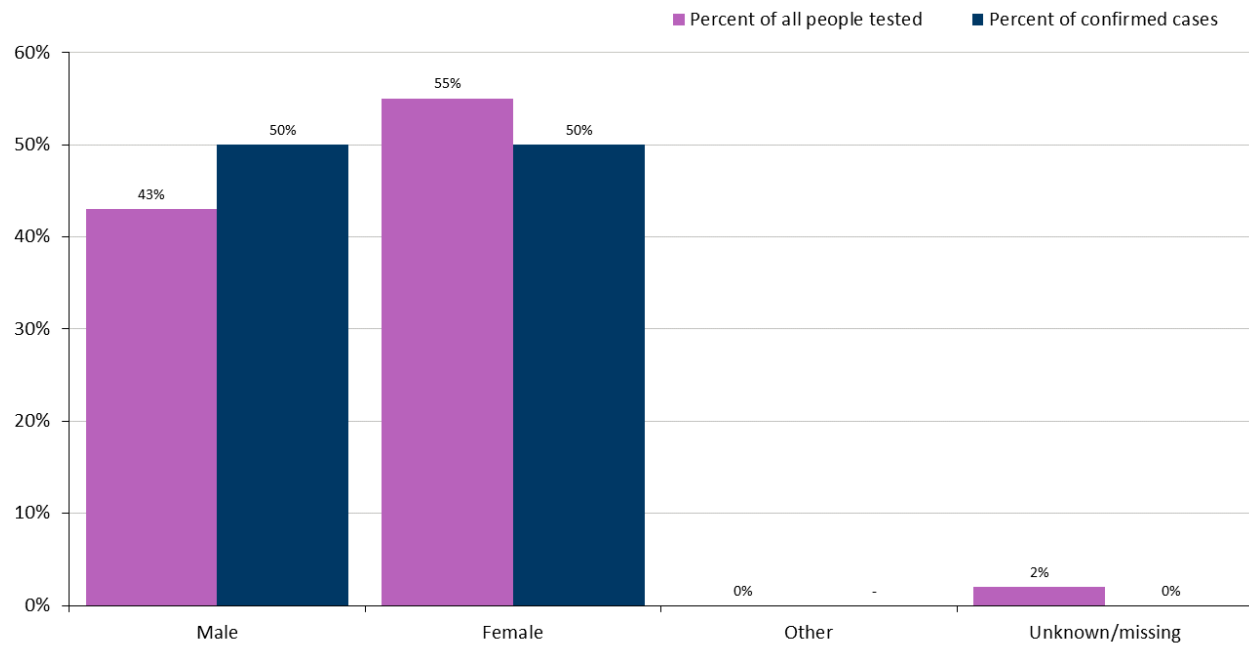

Race/Ethnicity	Number of people tested	Percent of all people tested	Number of confirmed cases	Percent of confirmed cases
White, non-Hispanic	468	61%	21	48%
Black, non-Hispanic	40	5%	1	2%
Asian, non-Hispanic	49	6%	2	5%
American Indian/Alaska Native	3	<1%	2	5%
Native Hawaiian/Pacific Islander	2	<1%	0	0%
Other, non-Hispanic	2	<1%	0	0%
Hispanic	138	18%	17	39%
Multiple races	31	4%	1	2%
Unknown/missing	35	5%	0	0%
Total	768		44	

- There were higher rates of positive cases in the Hispanic community compared to other race/ethnic groups.
 - Higher positive COVID-19 rates in this community can be attributed to systemic barriers, not individual behavior or cultural factors.

Gender

People were only able to select one gender.

Gender	Number of people tested	Percent of all people tested	Number of confirmed cases	Percent of confirmed cases
Male	333	43%	22	50%
Female	420	55%	22	50%
Other	0	0%	-	-
Unknown/missing	15	2%	0	0%
Total	768		44
