

Ticks, Mosquitoes, and Our Health

For local public
health and tribes

Speakers

Noon, Tuesday, March 3

Ask questions and learn about:

- Which vectors and vectorborne diseases are endemic in Minnesota
- How vectorborne disease surveillance functions in Minnesota and learn how Local and Tribal Health can assist with these efforts
- MDH vectorborne disease prevention key messages and learn about the wide variety of prevention resources and products available through MDH
- Goals and objectives of the Vector Program at the Bemidji Area Indian Health Service (IHS) and hear about their goals for future work

Erin Kough, MPH
MN Department
of Health

Shelby Foerg, REHS
Bemidji Area Indian
Health Service
