

memo

DATE: February 24, 2021
TO: WIC Coordinators
FROM: Nutrition and Clinic Services Unit
SUBJECT: Quick Connect for wichealth.org

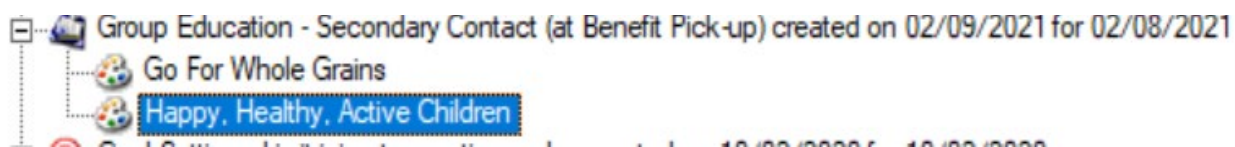

Coming March 1st - Quick Connect for wichealth.org!

What is Quick Connect?

- An import of wichealth.org lesson completion information directly into participant records.

How does Quick Connect work?

- When a user completes a wichealth.org lesson, the lesson topic and date information imports from wichealth.org to the Nutrition Education tab, Group Education Contacts in HuBERT. This import in the system occurs in the early morning of the next day. Below is an example of what a contact looks like inserted into the Nutrition Ed Tab:

- Lesson information is imported for all household members in an active certification. Every wichealth.org lesson is available for every category of participant in the Nutrition Education Tab including Pregnant, Breastfeeding, Non-Breastfeeding Postpartum, Infant and Child participants.
- The local agency has options for identifying families with completed lessons. The options include:
 - Use the InfoView report [wichealth.org Contacts](#) to identify participants with a completed wichealth.org lesson. This report provides the SWID and HHID for all participants with a wichealth.org lesson documented in the Nutrition Education Tab for a specified time. The local agency determines how frequently they would like to run the report, e.g., daily or weekly. **(Recommended option)**
 - Continue receiving emails from wichealth.org with the Certificates of Completion. The emails are sent after the completion of every lesson.
 - Or use both options above.

- Follow up with families with completed lessons and issue additional benefits. Review MOM [Section 6.7: Additional Nutrition Education](#) for expectation for follow up education with wichealth.org lessons.
 - For households with multiple members, the family may complete one lesson. However, as with in-person educational contacts, education should be relevant and individualized to the category and needs of each family member. Follow up to the on-line lesson should include discussion of any family member's nutrition/health in a category not covered by the on-line lesson.
 - Assure high-risk care follow-up is provided for any household members with a high-risk condition.

If you would like to start using wichealth.org for Additional Education Contacts, here are some resources:

- Check out the wichealth.org resources available at [WIC Education Choice](#).
- Watch the [wichealth.org Demonstration Video](#).
- See [Wichealth.org Lessons for the Minnesota WIC Program](#) for a complete listing of lessons. This document organizes the lessons by the wichealth.org topic areas. CPAs can use the list to become familiar with the lesson topics and as a guide for suggesting specific lessons for a participant.

Questions? Please contact your state consultant.
