- Clinic staff
- Pharmacy
- Vaccine staff

Lyophilized formulation of Rotarix no longer available for order

The lyophilized formulation of Rotarix is no longer available for order. The new, liquid formulation is available in MIIC. If you still have the lyophilized Rotarix vaccine in stock, keep the vial and oral dosing applicator in your storage unit until you can use it or until it expires. Use this stock up first before ordering the new liquid formulation. Be sure staff understands how to use the Rotarix presentation(s) you have in stock.

Vaqta syringes on backorder

Vaqta syringes are currently on backorder. They are not expected to be available again until the end of March. If you need hepatitis A doses sooner, Vaqta single-dose vials and Havrix are available now.
