

Some notes on the initial report draft:

- On Teams: General -> Report Development -> Final Report "PMTF Legislative Report_Working Draft"
 - The formatting of headers/footers is strange in the Teams version, in the Word doc version it's normal and cuts down the length by several pages; I recommend opening this in the desktop app.
- This draft in teams is a springboard, feel free to suggest any and all edits as you see fit by adding a comment
- Text in italics are notes, suggestions, areas to be filled in with the appropriate text as we move along. Comments are also left in the sidebar along the way.
 - Right now, the document is not open for editing, but feel free to leave comments
- Presently there's an appendix marked for personal anecdotes; this is a potential space for personal stories from members of the task force (and public, if we find that appropriate) regarding thoughts on psychedelic medicine (e.g., an instance in which psychedelic medicine helped you heal). This can also be a place for to discuss if there's disagreement with psychedelic medicine. **If this is something you would like to contribute to, please start thinking about drafting a paragraph or so by mid-September at the latest.**
- We can also create an appendix if there's disagreement (e.g. from state agencies) on certain recommendations, to provide context to a No or Abstain vote.
 - We can also create any other appendices or sections deemed necessary
